About me

I am a confident and driven individual who has a professional attitude, and I am excellent at adapting to different situations, environments and challenges, especially when working in a team. I'm dedicated to performing at the highest level, and to achieve my goals and objectives.

Achievements & Key Projects

Completed a Research Assignment [PAT] where we delt with all aspects of trying to create devices for home use, to better a household for their convenience.

Completed and created a Web Development project, where my colleagues and I built a website for a under privileged school. By using HTML, CSS, and JavaScript for an effective and practical website.

Created a python Banking App, with a GUI (Graphical User Interface).

Created a chat application using React and Node JS, to effectively communicate with users using an API to launch the application.

Work Experience

Currently attending an Internship at CapaCiTi, which gives access to a NQF Level 5 Systems Development program. This program emulates the working environment, which gives us the skills to do presentations, and abide to work polices designed to be efficient employees in the workplace.
